

### Subject:

### Year 7 Football

#### Overarching Topic:

Why is this topic being studied at this time?

How does it fit into the wider subject curriculum?

#### Overview

**Intent:** Our intent is to create a culture where students are able to carry themselves with pride when participating in Physical Education lessons and representing the school in extra-curricular fixtures. This will be achieved through a progressive approach, where we embrace new thinking in the pursuit of continuous improvement. Students play with respect and we set the standards for respect across Ravens Wood School. Lessons are inclusive and we champion the fact that football is and will remain a game for everyone. We promote determined learners who are tenacious and accountable to each other in serving the whole game and doing the right thing. We promote excellence in encouraging the students to achieve the very highest outcomes, which can only be achieved by sustained excellence in performance.

**Ultimate questions:** This unit of work will provide students with the knowledge and skills that will provide the foundations for their entire journey within Physical Education and sport at Ravens Wood School. Through a holistic approach, students will learn the rules, values, tactics and traditions of the sport. This approach will allow students to develop upon the knowledge gained in term one, but with sport-specific features, due to the differing intricacies of football and rugby. This module builds on the key facets of Physical Education that were introduced in term one; acquiring and developing skills, selecting and applying appropriate skills and tactics and evaluating and improving their own and other performances.

#### Joining Up

#### Looking ahead:

- ‘What are the key skills and why do you need to know them?’ – students will be introduced to the key skills in the game and will be taught how and when to apply these in a safe manner
- ‘What are tactics and why are they important?’ – students will be challenged to think tactically across a range of situations and will be encouraged to explore the reasons behind different tactical approaches
- ‘How do we achieve success as individuals and teams?’ – students will be encouraged to become reflective and analytical learners by evaluating their own and the performance of others and justifying suggestions for improvement

#### Looking back:

This unit of work builds on the various curricula across our feeder schools
