Supporting Students with Medical Conditions

2. REVIEW PROCEDURES

The Supporting Students with Medical Conditions Policy for Ravens Wood School is to be reviewed annually by the Headteacher.

3. AMENDMENTS

The Policy Document has been amended in light of updated guidance on supporting students with medical conditions, drafted by the Department of Education for maintained schools and proprietors of academies in England. It is the responsibility of the Headteacher to ensure that the complete amendment is incorporated into all copies of the document and recorded accordingly on the Amendment Sheet. Copies of pages made redundant by the amendment are to be disposed of immediately and not to be retained for any reason.

Master Copy Headteacher

Copy One Bromley Healthcare Nurse / Healthcare professional

Copy Two All First Aiders

Copy Three Staff Room – all staff

The Policy Document will be accessible to Parents / Carers and is available on the school website.

5. STATEMENT OF INTENT

The Governors and Headteacher of Ravens Wood School believe that ensuring the health and welfare of staff, students and visitors is essential to the success of the school.

We are committed to:

Providing adequate provision for first aid for students, staff and visitors.

Ensuring that students with medical needs, including both physical and mental health, are fully supported at school.

Procedures for administering medicines and providing first aid are in place and are reviewed regularly.

We will ensure all staff (**including supply staff**) are aware of this policy and that sufficient trained staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations.

We will also make sure that the school is appropriately insured and that staff are aware that they are insured to support students in this way.

In the event of illness, a staff member will accompany the student to the student Reception/medical room where necessary. In order to manage their medical condition effectively, the school will not prevent students from eating, drinking or taking breaks whenever they need to.

The school also has a Control of Infections Policy which may also be relevant and staff should be aware of.

Name: Melanie Lester - Headteacher

Date: Autumn 2024

6. Bromley Healthcare Nurse/ Healthcare Professional

The school liaises with Bromley Healthcare professionals, including nurses when required for medical advice on conditions, training needs and Healthcare plan advice.

7. The First Aid Team

A list of members of staff in the school who are trained in First Aid are held by the HR Officer and in Chapter 27. Special care and consideration go into selecting who is trained for first aid, and we have First Aiders situated around the site:

Trained Staff

Members of staff who are first aid trained are aware that where a student has permission by his/her parent, medicine can be administered by the student themselves, unless they are unable (ie EpiPen, epilepsy medication)

8. First Aid Boxes

The	first	aid	posts	are	located	in

- The Student Reception / Medical Room
- A1 Art Classroom Office
- DT Office Located in Office
- Science Department –First aid kit in every lab/Central prep room
- PE Office
- Sixth Form Office (AWI office)

9. Medication

Medication is defined as any prescribed or over the counter medicine. Students' medication is stored in the School Student Reception/Medical Bay.

10. First Aid

In the case of a student accident, the procedures are as follows:

The member of staff on duty calls for a first aider; or if the child can walk, takes him/her to Student Reception and calls for a first aider.

The first aider administers first aid and records details on the Medical Data Base system.

If the child has had a bump on the head, parents should be notified either via phone call or an advisory email. Full details of the accident are recorded on our Accident/Incident Form, if necessary.

If the child has to be taken to hospital or the injury is `work' related then the accident is reported to the School's Health and Safety Officer, to be reviewed.

If the incident is reportable under RIDDOR (Reporting of Injuries, Diseases & Dangerous Occurrences Regulations 2013), then as the employer, the Trust will arrange for this to be done.

11. School Insurance Arrangements

The school has public liability cover in place through its membership of the DfE's Risk Protection Arrangement.

12. School Visit

In the case of a **residential visit, students and their parents/carers are responsible for supplying adequate medication for the duration of the trip** and a residential first aider will be on hand to administer First Aid. Reports will be completed in accordance with procedures at the Residential Centre. In the case of **day visits** a trained First Aider will carry a travel first aid kit in case of need. All accidents will be recorded on the School Accident/Incident Forms and returned to Reception on return to School.

13. Administering Medicines in School

Non-Prescribed/Prescribed medicines - may be administered in school where it is deemed essential. Most prescribed medicines can be taken outside of normal school hours and therefore should be taken at home. However, where this is not possible, the student will administer their own medicine at school, under the supervision of a member of staff. In cases where this is not possible, the staff member will administer the medicine. A record of date, time, consent, student name, dosage and First Aider present is recorded on the Medical Tracker under "Medical Use".

If a child refuses to take their medication, staff will accept their decision and inform the Parents/Carers accordingly.

Medication will not be given to a student unless a parent/guardian has completed the online form which is located on the school website https://www.ravenswood.bromley.sch.uk/information/student-information-and-update-forms/. In all cases, the school must have written parental permission outlining the type of medicine, dosage and the time the medicine needs to be given. All medication should be sent in the original packaging and within the expiry date. Staff will ensure that records are kept

of any medication given.

14. Storage/Disposal of Medicines

In some cases, children will be allowed to carry their own medicines/relevant devices (diabetic medicine/asthma inhalers) or will be able to access their medicines in the School Student Reception for self-medication, quickly and easily. **Students' medicine will not be locked away out of the students' access; this is especially important on school trips**. They will however, be locked away overnight and during school holidays. It is the responsibility of the school to return medicines that are no longer required, to the parent/carer for safe disposal, or to inform the parent/carer and arrange safe disposal.

Emergency Asthma inhalers are located around the school site for emergency use, as per the Department of Health's protocol. Parents/Carers of students with asthma are requested to give permission for the school to use the Emergency Asthma Inhaler if needed. Such incidence will be recorded under the medical tracker and courtesy phone call home is made to inform the parent / carer is made.

15. Accidents/Illnesses requiring Hospital Treatment

If a student has an incident, which requires urgent or non-urgent hospital treatment, the school will be responsible for calling an ambulance, or providing school transport, in order for the student to receive treatment. When an ambulance has been arranged, a staff member will stay with the student until the parent / carer arrives, or accompany a student taken to hospital by ambulance if permitted.

Parents / carers will then be informed and arrangements made regarding where they should meet their child. It is vital therefore, that parents / carers provide the school with up-to-date contact names and telephone numbers.

For non-urgent treatment at hospital, should a parent / carer be unable to collect their child to go to hospital within 30minutes, school staff will gain permission from the parent / carer and 2 members of staff will take the student to hospital (in the school mini bus). One member of staff will endeavor to remain with the student until a parent / carer arrives.

16. **Defibrillators**

Defibrillators are available within the school as part of the first aid equipment. First response First Aiders are trained in the use of defibrillators. They are located in Student Reception/PE Department/Staff Room/Visitor Reception.

The local NHS ambulance service has been notified of the location of all defibrillators in the school. They are checked monthly and logged on NHS Ambulance Service Database.

17. Students with Special Medical Needs – Individual Healthcare Plans

Where necessary, an Individual Healthcare Plan (IHCP) will be developed in collaboration with the student, parents/carers, Special Educational Needs Coordinator (SENCO) and medical professionals, including the School Nurse if necessary.

This is because some students have medical conditions that, if not properly managed, could limit their access to education. These children may be:

Epileptic, Asthmatic, Diabetic, Sickle Cell

They may also have severe allergies, which may result in anaphylactic shock.

Such students are regarded as having medical needs. Most children with medical needs are able to attend school regularly and, with support from the school, can take part in most school activities; unless evidence from a clinician/GP state that this is not possible.

The school will consider what reasonable adjustments they might make to enable children with medical needs to participate fully and safely on school visits. A risk assessment will be used to take account of any steps needed to ensure that students with medical conditions are included.

The school will not send students with medical needs home frequently or create unnecessary barriers to students participating in any aspect of school life.

However, school staff may need to take extra care in supervising some activities to make sure that these students, and others, are not put at risk.

An individual health care plan (IHCP) can help schools to identify the necessary safety measures to support students with medical needs and ensure that they are not put at risk. The school appreciates that students with the same medical condition do not necessarily require the same treatment.

Parents/carers have prime responsibility for their child's health and should provide schools with information about their child's medical condition. Parents / Carers, and the student if they are mature enough, should give details in conjunction with their child's GP and Pediatrician. The school nurse may also provide additional background information and practical training for school staff.

Procedure	that will be followed when the school is first notified of a student's medical condition
	Obtain Medical verification
	Liaise with Bromley School Nurse for advice and guidance
	Arrange a meeting with parent/school Medical Coordinator and Head of Year to discuss "care plan action"

Once care plan is drafted and agreed to be signed by all parties and filed on BromCom and staff to be notified. Care plans are reviewed annually.

This will be in place in time for the start of the relevant school term for a new student starting at the school or no longer than two weeks after a new diagnosis, or in the case of a new student moving to the school, mid-term.

18. Nut Aware School

A reminder that our school endeavours, as far as possible, to be a nut-free school, this includes sesame seeds and mustard products. We have quite a number of students in school who have severe nut allergies and can be seriously affected by someone else who is eating – or may have recently eaten – nuts. Even if you eat a product containing nuts, this can have a serious effect on a student later on in the classroom.

Disclaimer: Although we strive to be a nut-free school, it is

impossible to provide an absolute guarantee that no nuts will be brought onto the premises

19. Recognising students and staff with religious beliefs

Where the school is aware of students and staff with religious beliefs that may affect them medically, these are noted on the School Information Management system (BromCom), in the medical notes section, to ensure appropriate actions are taken in the event of a medical emergency; examples include, but are not limited to:

Ramadan fasting

Yom Kippur fasting

20. Request for an Ambulance

Dial 999, ask for ambulance and be ready with the following information:

1. Your telephone number: 01689 856050

Give your location as follows: Oakley Road, Bromley, Kent

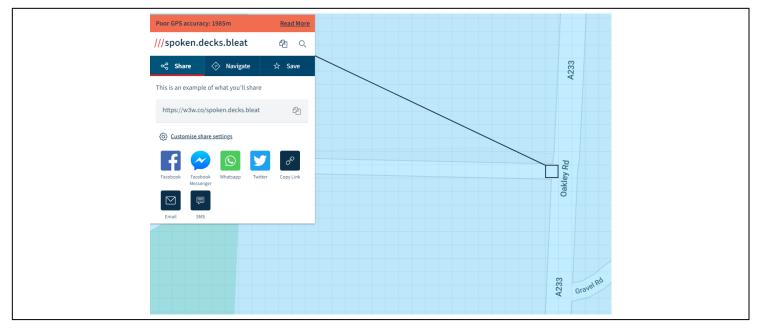

3. State that the postcode is: BR2 8HP

4. Give exact location in the school

- 5. Give your name:
- 6. Give name of child and a brief description of child's symptoms

Inform Ambulance Control of the best entrance and state that the crew will be met and taken to the casualty. Speak clearly and slowly and be ready to repeat information if asked. Put a completed copy of this form by the telephone

Food Safety Policy Statement

The Company is committed to providing food for our clients and customers which is safe to eat and meets their quality expectations. It recognises and accepts its responsibility to comply with the food safety requirements of current legislation and industry standards.

The Company has developed and adopted food safety policies and procedures that meet legal requirements and industry best practice to achieve its objectives.

The Company acknowledges that successful implementation of this policy requires full commitment from all levels of management and employees, and requires that:

- All employees are provided with the information and training necessary to enable them to perform their tasks in a hygienic manner.
- All employees accept responsibility for ensuring that when performing tasks, they do
 so in a hygienic manner so that the safety, soundness and wholesomeness of the
 food they process is not put at risk.
- All employees co-operate with management or any other authorised person to ensure that statutory obligations are properly complied with.

The company recognises that a successful food safety culture can be achieved only by following safe working practices and procedures developed through effective hazard analysis, training and experience. The following arrangements promote such a culture:

- The Company will measure its performance in relation to food safety by audit and by investigation of incidences of ill health or injury.
- The Company food safety policy will be subject to continuous review and revision particularly when changes to legislation or technical knowledge occur.

The Company recognises that the prevention of food poisoning and the promotion of excellence in food service brings tangible benefits to our workforce, clients and customers and contributes to good business practice.

Detailed organisational arrangements and food safety responsibilities for all levels of management are contained in each site food safety manual, Dimensions.

lan Crabtree Managing Director Accent Catering Services Ltd

TO THE BEST

of our ability,

this is a

NUT

FREE SCHOOL.

HOWEVER, we

cannot guarantee

that all of our food

ingredients have

been prepared in a

NUT FREE
ENVIRONMENT!

We will always highlight the following allergens on our menus:

Accent Catering understands that food allergens can present serious problems for some of our pupils who eat within our dining facilities.

As a business:

- We monitor all of our ingredients through an approved online system
- Recipes are cross referenced with this online system prior to production
- Packaging is checked on delivery to ensure ingredients / allergens match to the online system
- We display allergen contents where appropriate on our menus
- Customer's are encouraged to ask if they are uncertain of the contents of any dish
- All records are kept close to the point of service and can be evidenced if customer's need re-assurance
- All of our staff are trained to recommended FSA standards, refreshed termly and annually
- We also work with Coeliac UK to ensure our teams are aware on how to minimise cross contamination when preparing gluten diets
- We do not order nuts of any sort in our kitchens. We do not intentionally use any products that contains nuts or nut derivatives within our school menus

Whilst we go to great lengths to ensure we can provide meals safely which do not include the nominated allergens as we cook all our food from fresh, we cannot guarantee that dishes do not contain traces of allergens, as they may be served or prepared in the same areas as nominated allergens.

For example, Accent Catering does not use nuts in any of the food that we prepare and serve. We are however unable to guarantee that dishes/products served are totally free from nuts / nut derivatives. This is because, ingredients, for example, croissant, may be made in a factory containing nuts, bread may be baked in a factory handling nuts, or some production lines may have machines lubricated with nut oil.

We make every effort to keep up to date with new products and changes in products to ensure to the best of our knowledge that we adhere to this.
